

Organ Harvesting

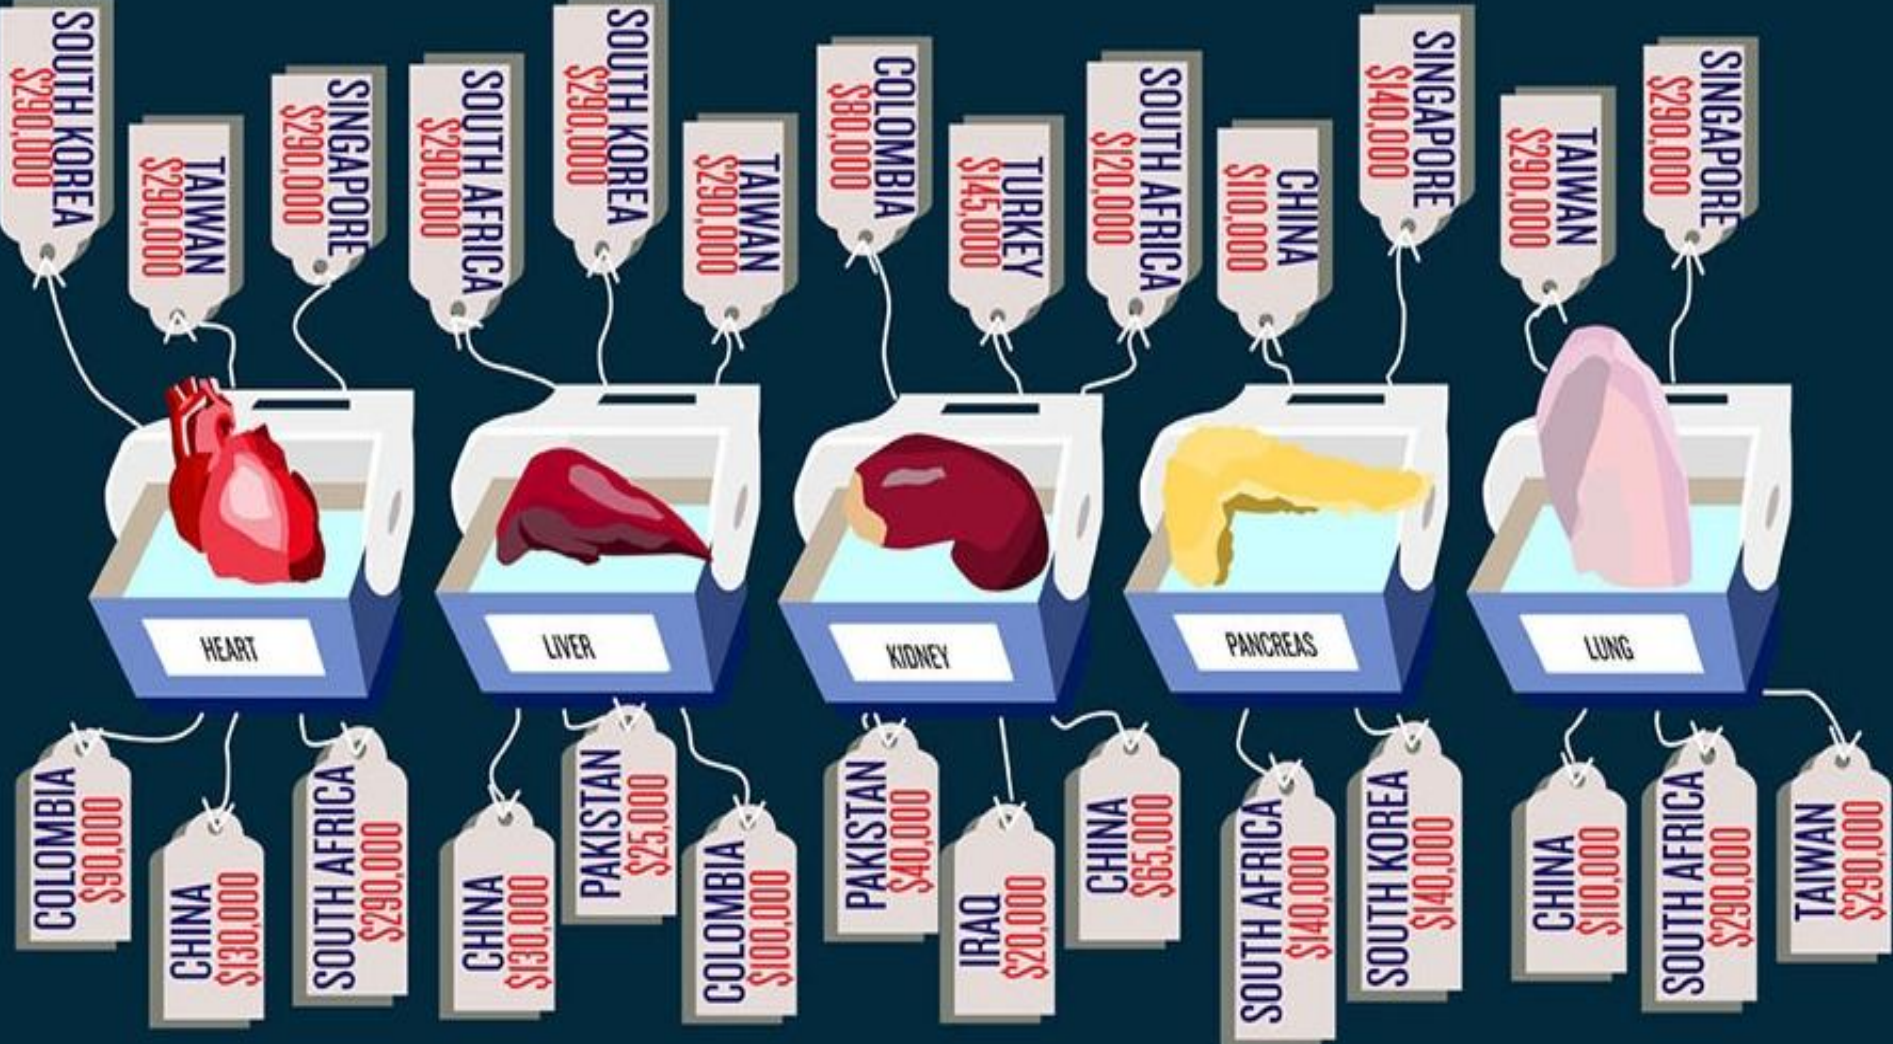

Did you know?

- 2,100 new patients are added to the organ donation waiting list every month.
- 16 to 17 people die every day while waiting for transplants.
- 10,000 to 14,000 people who die each year meet the criteria for organ donation, but ...
- Less than 1/2 of those people actually become organ donors.

There is an average of one organ sold in the U. S. every hour.

The average donor gives about three of those organs.

Only 30% of these people are consensual donors.

“Sure, it happens in China all the time.
But it wouldn’t happen in America. Our
government would never allow it...
Right?”
